

## **Welcome**

Hello! My name is Amanda Hodges and this is my E-Portfolio. Currently, I am a candidate for a Masters of Science in Instructional Technology (MIT) at the University of North Carolina at Wilmington (UNCW).

The MIT program provides students with the opportunity to study the field of instructional technology and its applications in business and industry, military, healthcare, and the K-12 education fields. Applications in design, development, utilization, management, and evaluation are taught throughout the course of study and graduates of the program are competent in applying their skills to these domains of instructional technology practice.

The E-Portfolio product was designed and developed as a way that students can demonstrate their skills and knowledge within the study and practice of instructional technology. My E-Portfolio is intended to demonstrate my knowledge of the domains of study, understanding of theory, use of theory in practical application, and how my knowledge and skills meet the competencies of the instructional technology field.
