# <u>Performance Analysis for Lakeside High School</u> Integration of Technology into the Math And Social Studies Curriculum

One of the main goals of the Technology Department and Lakeside High School is to integrate technology skills into each core subject area for student success. By integrating technology, the belief is to prepare students to be productive citizens in our global and technological society. The hope is to enable teachers to make use of various software and online programs, as well as using diverse teaching strategies to increase technology integration in accordance with North Carolina Standard Course of Study.

Teachers receive training from the schools computer resource teacher for the integration of technology into their core subject area. Currently, the Science and Language Arts teachers at Lakeside use a variety of software programs along with online resources in their lessons. The Math and Social Studies teachers, who receive the same training as the Science and Language Arts teachers, are reluctant to integrate technology into their lessons. They are unwilling to sign up for computer lab time and are hesitant to discuss ideas on how to integrate technology into their lessons.

The focus of the Human Performance Enhancement analysis at Lakeside High School is to reflect and uncover the reasons why the Social Studies and Math teachers do not integrate technology and use the available technology resources.

Analyses of the 4 environments affecting human performance at Lakeside High School describing the "What Is" and "What Should Be" are explained below..

## The Organization Environmental Level

- The North Carolina Department of Instruction requirements and regulations surrounding technology integration
- The mission of New Hanover County Schools in the area of technology integration
- Technology requirements for teachers in the New hanover County Schools

#### **Questions asked:**

- 1. What is the name of the organization?
- 2. What is the mission statement regarding technology integration in the New Hanover County School system?
- 3. What are the technology requirements for teachers in the New Hanover County School system?

# **Data Collected:**

Technology standards and requirements found on the North Carolina Department of Instruction web site.

The five year Technology Plan for New Hanover County Schools along with the requirements for teachers requiring technology competencies and standards..

# **Work Environment**

- Administration expectations
- Computer Lab Schedule
- Media Advisory Team expectations for the integration of technology

# **Questions asked:**

- 1. What are the expectations held by the administration at Lakeside High School requiring technology integration?
- 2. What events have happened over the past 4 years that have affected the administration at Lakeside High School?
- 3. How is the computer lab schedule determined?
- 4. What is the Media Advisory Team and its function at Lakeside?

#### **Data Collected:**

Interview with the current administration Computer lab schedules Media Advisory Team minutes from meetings and interview

What Is Happening	What Should Be Happening
Lakeside High School, over the past 5 years, has had 4 principals with different philosophies and expectations of technology integration.	Consistency and stability of technology integration is supported and expected by the principal(s) at Lakeside High School.
Based on computer lab schedule at Lakeside High School, provided by the Computer Resource Teacher, indicates that the Math And Social Studies teachers used the computer lab to integrate technology only 12 times throughout the 2003-2004 school year.  Language Arts and Science teachers used the computer lab for integration approximately 90 % of the time.	Technology is integrated into Math, Science, Language Arts, and Social Studies on an equal basis.
Based on an interview with the Media Advisory team at Lakeside High School, the Social Studies and Math teachers are taking on the role of laggers in adopting technology integration into their curriculum and lesson plans.	Based on the goals of the Media Advisory team at Lakeside, Math and Social Studies teachers will utilize new technologies and software resources in their classrooms.

# **Work Issues**

- Departmental planning/ Computer Resource teacher availability and guidance
- Media Advisory Team assistance
- Accessibility
- Accountability and consequences

#### **Questions asked:**

- 1. Have the computer competency standards been formulated and expressed to the teachers so that they know exactly what results are expected of them?
- 2. How well do the teachers understand, and agree with, the computer competency standards?
- 3. How attainable and realistic is it to integrate technology, in the opinion of the teachers?
- 4. How clear are the expectations for teacher to integrate technology into their subject area?
- 5. What are the consequences of teacher's not integrating technology into their subject area?

# **Worker Issues**

- Training issues/effectiveness
- Follow up sessions to training
- Teacher skill level
- Attitude of teachers
- Motivation

#### **Questions asked:**

Is training offered during the school year with the focus on integrating technology into specific subject areas?

After training is held are there any follow up sessions for teachers to ask questions or express their concerns?

What is the attitude of teachers towards integrating technology into their lessons?

What would motivate teachers to integrate technology?

What is the skill level of each teacher?
