

## Professional Goals

As I continue my career in Instructional Technology, I plan to:

Utilize my knowledge of needs assessment, instructional design, performance improvement, project management and multimedia development to drive my performance as an instructional technology professional in the private or public sector.

Constantly seek opportunities to advance by utilizing my educational experience, willingness to learn, drive to improve and knowledge of the instructional technology field.

Consistently provide the highest quality instructional products to all who are affected by my work. Diversify my professional experience by obtaining a position as an instructional systems analyst, performance improvement specialist or multimedia developer in the corporate or small business arena.

Continuously improve my skill set through attending ongoing professional development, subscribing to relevant and up-to-date publications, researching emerging technologies and collaborating with other professionals in the instructional technology field.
